Imitation leather products are made by the new company, which has an established business both in this country and abroad. TORREY FARM.

Represents the First Endowment Ever Made to Yale University.

A fact of interest at the present time is that the Torrey farm at East Putnam, a property that has been in the family two hundred years up to this time in 1912, represents the first endowment that was ever made to Yale university.

The land originally came into possession of the historical Major Fitch, who died "about 800 acres of wild land in the northeastern part of the town of Killington to Yale university," this in 1712, when that part of the town of Putnam was included within the boundaries of the town of Killington. Before Major Fitch received title to the land it was the property of the Indians living hereabouts.

In 1712, Rev. John Fiske, first pastor of the first church in the town of Killington, traded certain lands in the town of Salisbury, Conn., and gave certain money considerations to the trustees of Yale in exchange for the "wild land" mentioned. This Rev. John Fiske was the fifth great-grandfather of Attorney Charles L. Torrey of this city and of his brothers, who still live here and are resident in the section of the town and on the property under consideration.

Without a break through all the 200 years this property has remained in the family and at the present time the children of the ninth generation are growing to manhood and womanhood at the home that stands upon it. From among those who have made up and have been included within the number of those of the nine generations have come statesmen, jurists, educators, congressmen, and others who have made exceptional and enduring records in many parts of the country. College presidents, college professors and men and women of note have spent their early days on this land of historic interest.

Election Expenses.

The returns filed here by candidates for office at the national election held on November 5, show that there was no exceptional expenditure in an effort in the name of any party or in the interest of any person to secure the honor of winning. The majority of the candidates, especially for the minor offices, spent nothing, while those who did meet costs of election did not find themselves heavily assessed. Wednesday marked the expiration of the fifteen days allowed for the filing with the town clerk of election expense returns.

There is apparently no truth in the rumor that has been in circulation here for two days that Flagman Gallagher, held responsible for the railroad wreck, had given himself up to officials.

YOUR BABY'S HEALTH DEPENDS ON ITS NOURISHMENT

In nature's original plan, infants were nourished by mother's milk, but in our modern civilization this is often neither possible nor even advisable.

Failing the natural food, one instinctively turns to cow's milk, but this cannot always be used, as owing to its variable quality and the heavy indigestible curd, the delicate stomach of a young baby cannot always digest the nutriment which it undoubtedly contains. In such cases

BORDEN'S Malted Milk

IN THE SQUARE PACKAGE
meets every requirement.
It contains six times the nutrition of ordinary milk, but the curd being broken up by digestive agents in the malt, every particle of nutriment is easily absorbed by the very youngest.
